Fresh thinking in sanitisation

Ozone has been used for many years in the dry cleaning industry due to its' ability to break down and destroy odour, rather than simply masking it, and ozone is now becoming a common treatment to remove odours from garments in storage.

The solution needs to be quick, effective, and affordable. Ozone eliminates odours from body odour, smoke, urine, and sickness by reacting with and destroying them at a molecular level. After treatment ozone naturally returns to oxygen, leaving no perfumed or chemical smell. Only fresh air remains.

## Possible uses include:

- Removal of Musty Odours from Storage
- Smoke Damaged Clothing
- Body Odour Removal
- Removal of Odours such as Pet Odours, Alcohol, Vomit, Urine, Feces

Biofresh ozone generators are simple, quick, and easy to use, requiring no chemical refills, meaning that they have minimal running costs.

## Suggested Applications:

We offer a range of products to deal with various size treatment areas and specific concerns, please contact us to discuss which of the following will be most appropriate to your requirements.

Biofresh – This plug-in unit can be used continuously in the home or shops where clothes are stored to remove odours from sources such as food, tobacco, body odour, and damp.

## Meridian

The Meridian is our budget priced portable Ozone machine, this unit offers a range of operation times and will leave your clothes odour free after operation.

## Corona

Our smallest portable room treatment machine, the Corona must be operated in an unoccupied area where it will reduce mal odour.

## Continental

The Continental will manage odours keeping the area fresh and odour free.

## Cubo

The Cubo will thoroughly sanitise and deodorise storage rooms in which it is operated and, because of its' Ozone destruct facility, the room will be ready for reoccupation immediately after use.
