

Large Conference Rooms

Fresh thinking in sanitisation

Conference Room can be a difficult environment in which to maintain the high standards of hygiene required by clients. Body odour, alcohol and food smells can all be present.

Extensive use of chemical cleansers is common, but these chemicals cause unpleasant odours themselves, and give the impression of merely masking the cause of the problem.

The solution needs to be quick, effective, and affordable. Ozone eliminates odours from incontinence, smoke, bacteria and virus by reacting with and destroying them at a molecular level. After treatment ozone naturally returns to oxygen, leaving no perfumed or chemical smell. Only fresh air remains.

Ozone will reach through the entirety of the room and so is also effective in cleansing areas which are physically difficult to clean, as well as soft furnishings, fabric, and curtains.

Possible uses include:

- Removal of Body Odour
- Removal of Alcohol Smells
- Removal of Food Odours

Biofresh ozone generators are simple, quick, and easy to use, requiring no chemical refills, meaning that they have minimal running costs.

Decontamination Unit

This machine can be used to thoroughly sanitise empty rooms, as an effective alternative to chemical treatments.

Cubo3

The Cubo is light and portable, with inbuilt timers so that staff can get on with their work and return to the room when the process is complete.

It will sanitise the area where it is operated, and because of its Ozone destruct facility, the room will be ready for reoccupation immediately after use.

Cubo3 Delux

In addition to the features of the standard Cubo, the Cubo Delux model allows wifi control and monitoring by operators or managers from a remote location.

Suggested Applications:

Member of
EUO₃TA.org
European Ozone Trade Association

Under Biocidal Products Regulations (EU) 528/1012 anyone who wishes to market an ozone generator for a biocidal application within the EU must have their product authorised in accordance with the BPR. Biofresh are a member of the EUOTA Ozone Task Force which has submitted an ozone dossier to meet the requirements of these regulations.
