

Toilets

Fresh thinking in sanitisation

Removal of unpleasant odours from toilets and bathrooms is frequently managed by chemicals or air purifiers, which leave a strong smell themselves and are frequently merely masking the cause of the problem.

The solution needs to be quick, effective, and affordable. Ozone eliminates odours by reacting at a molecular level, reacting with and destroying them. After treatment ozone naturally returns to oxygen, leaving no perfumed or chemical smell. Only fresh air remains.

Ozone will reach through the entirety of the room and so is also effective in cleansing areas which are physically difficult to clean, as well as bedding, carpets, soft furnishings, fabric, and curtains.

Possible uses include:

- Removal of Toilet Odours

Biofresh ozone generators are simple, quick, and easy to use, requiring no chemical refills, meaning that they have minimal running costs.

Suggested Applications:

Meridian

The Meridian is our budget priced portable Ozone machine, this unit offers a range of operation times and will leave the toilet or bathroom odour free after operation.

Cubo

The Cubo will thoroughly sanitise and deodorise storage rooms in which it is operated and, because of its' Ozone destruct facility, the room will be ready for reoccupation immediately after use.

Continental

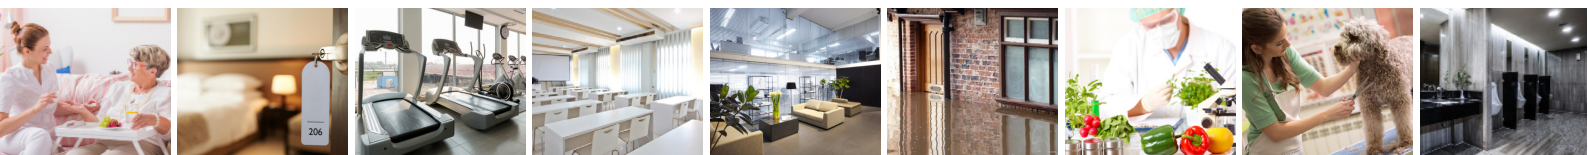

Our Continental units are designed to be used in occupied areas, they will manage mal odours within your washroom area without the need for chemicals or any costly consumables.
