

OZ1000-OZ2000-OZ4000 Ozone Generators

Number of Colony Forming Units of Fungi per Berry (Not Infected).

Analog line generators capable of treating cells of any size. Biofresh ozone generators are combined with oxygen concentrators.

The units are constantly monitored by sensors installed inside the cold room, which maintaining the correct concentration of ozone as well as ensuring health and safety standards for operators working in the cold room.

The systems are secure and reliable with minimal maintenance requirements.

The graph shows that prolonged treatment of strawberries with ozone is able to reduce the level of contamination from the first day of treatment, with results in 3 days, 6 days and 10 days of treatment.

No Chemical Residues
